

POWER

FLEXIS

MULTIFUNCTIONAL BATTERY CHARGER

Programmable, high-frequency modular traction batteries charger

www.axima-power.com

INTELLIGENT CHARGING

MAIN FEATURES:

- OPPORTUNITY CHARGING
- TIME – SCHEDULED CHARGING
- AUTOMATIC BATTERY VOLTAGE AND CAPACITY RECOGNITION
- DEDICATED CHARGING CURVES FOR LITHIUM BATTERIES
- ESTIMATED TIME – TO – END – OF – CHARGING CYCLE
- LOW OPERATING COSTS
- MODULAR SYSTEM
- USER – FRIENDLY INTERFACE
- SETTINGS VIA OPERATING PANEL OR PC

- Efficiency up to 95%, power factor $\cos \varphi \sim 1$
- Active PFC and soft-start
- Verification of connected battery
- Possibility to use one charger for more different batteries
- Possibility to set up preset and custom charging curves
- High resistance to mains disturbances
- Galvanic separated output mains
- Memory for 2.000 charging cycles
- Regeneration charging - desulphation and equalization

FLEXIS is a fully programmable, high-frequency traction battery charger. FLEXIS optimizes charging technology prolongs the working life of the battery, accelerates charging and saves energy. FLEXIS charger meets the hard requirements of three-shift service in industrial areas.

SIGNALING DISPLAY

Operating panel allows to set parameters of charging – charging is adjusted to the values of battery.

- Operating conditions are signaled by change of colour of the display important values are displayed
- Display is big and bright, all charging stages are visible from long distance and different angles
- Display shows estimated duration of the charging cycle

Standby mode

Charging

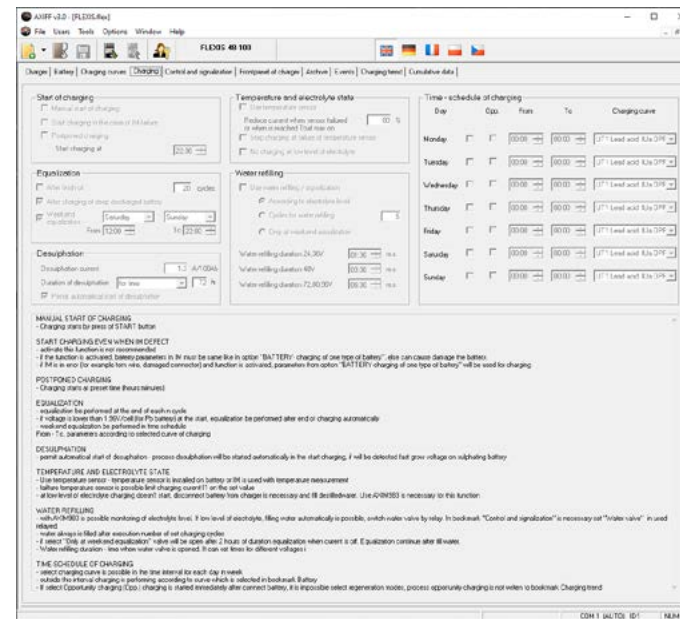

Charging finished

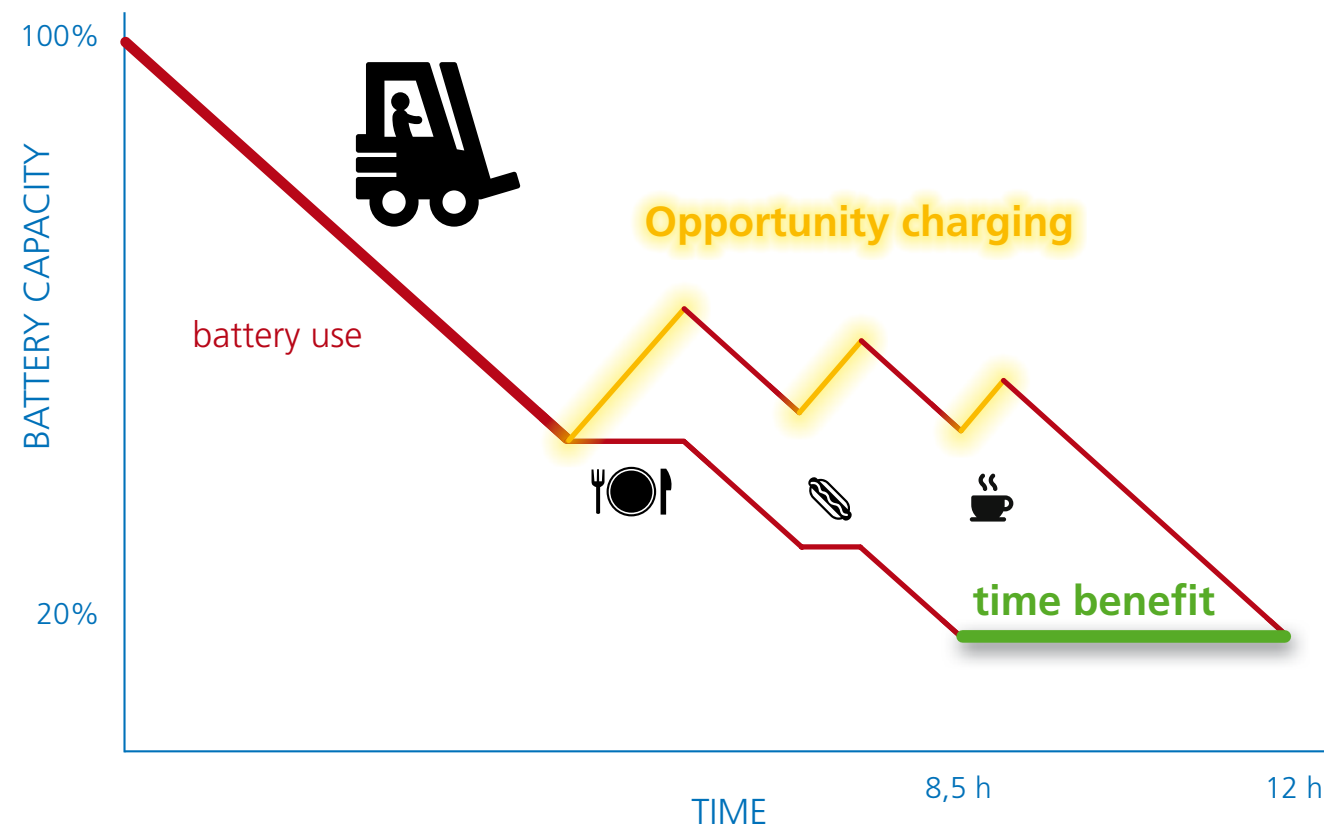

Error

CONFIGURATION SOFTWARE

- User friendly and intuitive configuration programme
- Fully adjustable charging current and voltage
- Possibility to use one charger for plenty of different batteries by manual selection
- Setting opportunity charging
- Time schedule of charging

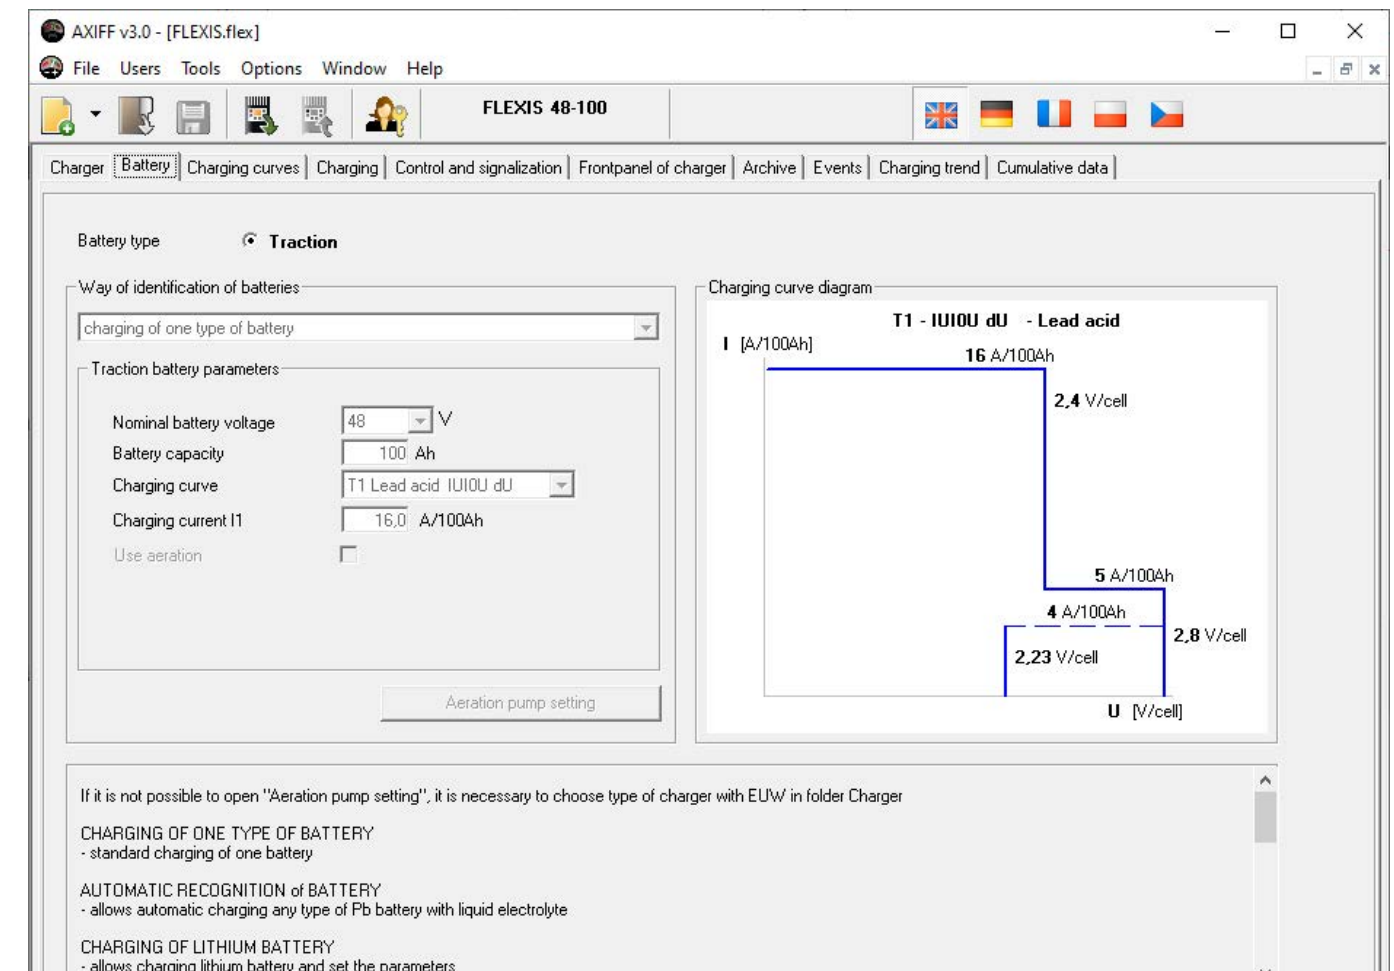

Opportunity charging is a way of fast battery charging by higher current than common charging. During a few short and intensive charging cycles, the time of battery service is significantly longer. Working breaks are used for opportunity charging to substantially prolong the forklift worktime without a battery exchange. This way of charging minimizes downtime in operation and increases your material handling fleet effectiveness.

Back **analysis** of charging archive optimises operating costs, helps to save electrical energy and prolongs working life of battery

- Precise setting of the charging parameters ensures an optimal care of the battery
- Selection from the preset charging curves
- Possibility to modify extra charging curves to suit every type of battery
- Periodical regeneration – makes care of batteries easier

OPTIONAL EQUIPMENT

Air electrolyte circulation

- reduces charging time
- reduces power and water consumption
- prolongs working life of batteries

Automatic water refilling

- keeps electrolyte level
- saves cost for servicing

Battery identification module AXIM

- one charger for more batteries

Temperature sensor

- compensation of charging voltage according to battery temperature

External signaling

- outputs for signal column
- 3 potential-free contacts for signaling

Remote control

- 2 digital inputs for remote control

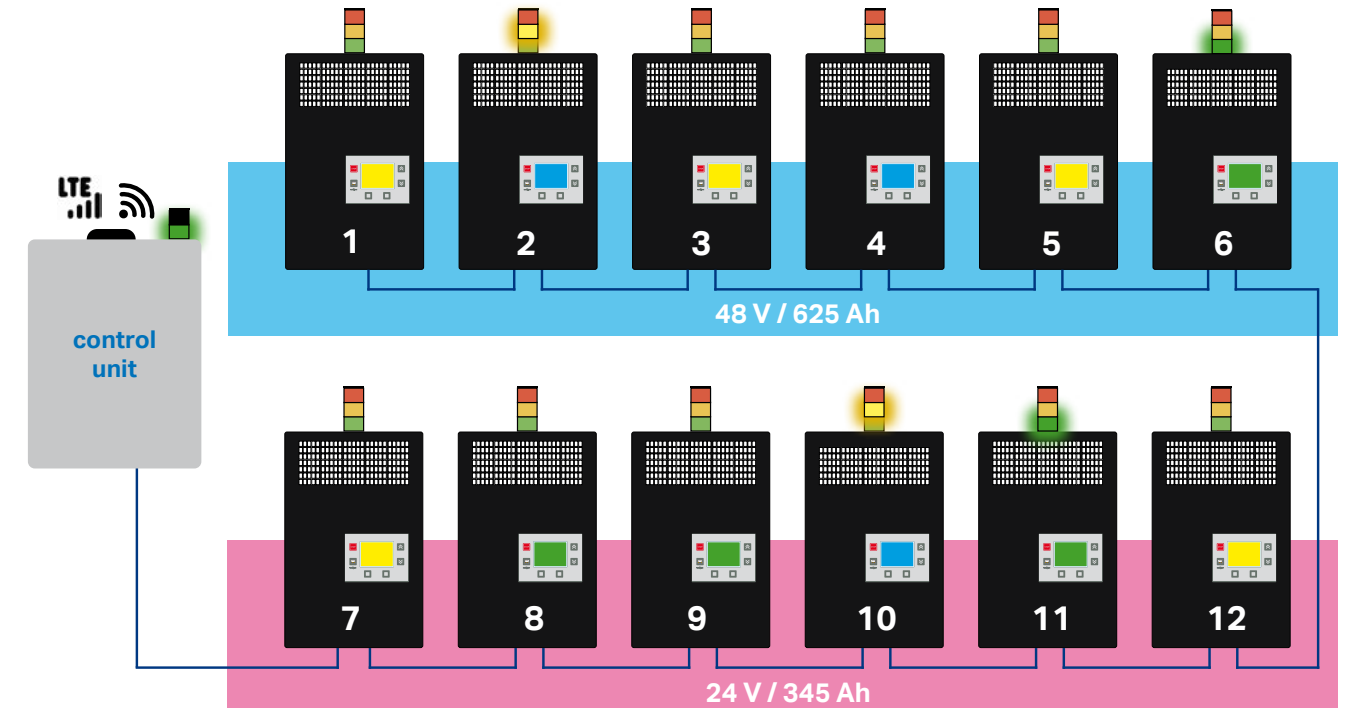

AXINET

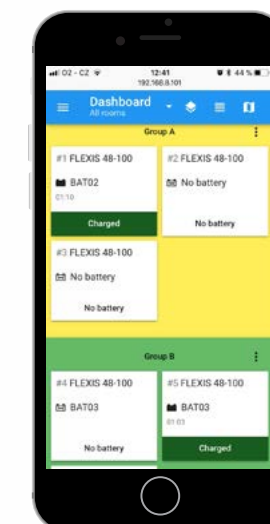

SMART BATTERY ROTATION SYSTEM

Software for effective charging station

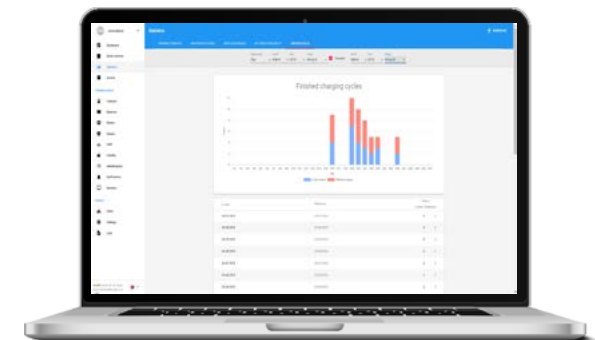

GROUP	PUT	TAKE
48 V / 625 Ah	2	6
24 V / 345 Ah	10	11

AXINET is a system that optimizes the operation of charging stations using chargers from the FLEXIS series. The system connects individual chargers into groups according to their batteries and evaluates their condition. The AXINET system increases usability of batteries and chargers, thus reducing operating costs to the minimum. The AXINET data network system can connect up to 255 FLEXIS chargers and thereby acquire an overview of the condition and utilization of the operation.

- Smart web app
- Battery return place assignment, charged battery indication
- Identification of batteries, personnel and forklifts
- Automatic reports via e-mail
- Clear visualization of individual charging points
- Archive of charging cycles
- Statistics for battery usage and operations
- Remote access via 4G

* Intended also for 96V and 110V Batterie Other types on request. Battery capacity values in the table according to IULa dU charging curve.

Dimensions for mounting on a vertical surface

Case	Width	Height	Depth	X	Y
FF170	477	302	169	230	515
FF250	477	302	254	230	515
FF330	477	302	339	230	515
FF550	477	547	339	499	515
FF720	477	717	339	699	515

Dimensions in millimetres [mm]

X and **Y** are positions of mounting holes

Efficiency	up to 94%
Output voltage stability	± 1 %
Cooling	forced ventilation
Degree of protection	IP20
Operating conditions	-10°C to +40°C
Protection class	I
Standards	EN 61000-6-2 EN 61000-6-4 EN 60950-1
